

Detailed Solution[Download Solution PDF](#)**Concept:**

The time and frequency are the parameters that are inversely related.

—

Calculation:**Frequency mode**

The reading is obtained by the multiplication of frequency applied and input time.

$$1000 = 1 \text{ sec} \times f$$

$$f = 1000 \text{ Hz}$$

Period mode

The reading is obtained by the multiplication of frequency applied and input time.

—

The counter is 1000.
